# CONFERENCE EMC FOR BUSINESS

Meeting for specialists of the electronics industry.

12th -13th October 2017 - Wrocław

REQUIREMENTS | DESIGN | TROUBLESHOOTING

Is there any better way to learn than the mentor support or people with several years of experience? My conclusions from working in the laboratory and cooperation with the design offices of many companies show that profit from the knowledge of practitioners is an optimal way to educate specialists. It is based on sharing proven solutions of real projects, along with an explanation of the importance of the various stages of operations. The "EMC for Business" conference is part of this way. I sincerely invite you to participate in this such an important event in the electronics industry.

**Tomasz Utkowski**  
Engineer, Consultant, Trainer

*EMC – ELECTROMAGNETIC COMPATIBILITY*

TRAINING | WORKSHOPS | SEMINAR | DISCUSSIONS

IDEA

Meeting of EMC practitioners struggling with EMC requirements, where speakers from the industry present their experiences on the basis of real-world projects for different requirements, electronics design, testing and problem-solving. **The event based on the exchange of knowledge, discussions, and workshops.**

Requirements	Design	Troubleshooting
1. Requirements affecting the EMC: Restrictions: <ul style="list-style-type: none"> <li>✓ costs,</li> <li>✓ energy consumption,</li> <li>✓ temperature,</li> <li>✓ and others.</li> </ul> 2. Selection of requirements for unusual typical devices (equipment). Exclusive requirements.	1. Learn about the various system solutions. 2. Different approaches to design. 3. Identification of places of potential threats. 4. How to avoid errors? 5. Communication in a design team, and effects.	1. Tracking sources. 2. Main problems. 3. Simplified testing methods. What can we do by our own? 4. Measuring equipment and results interpretation. 5. Find the cause of the problem.

SPEAKERS FROM THE COMPANIES
